Removes Shippon from the Green Belt

You need to give your views in your own words if you believe Shippon should remain in the Green Belt or any other views that you may have.

Main Point: There are no exceptional circumstances for removing the small historic village of Shippon from the Green Belt as there is no conflict between the strategic need of LPP2 to build 1200 dwellings on the Airfield and the local residents firmly stated need for separation from such a large new development that could ultimately become a very large new settlement.
